SOFTWARE REQUIREMENTS SPECIFICATION (SRS)

College Website System

The New Progressive College of Computer & Management Studies

---

1. Introduction

1.1 Purpose

This Software Requirements Specification (SRS) document describes the functional and non-functional requirements for the College Website System of The New Progressive College of Computer & Management Studies.

This document is intended for developers, project guides, administrators, and stakeholders.

1.2 Scope

The College Website System is a web-based application that provides:

- College information
- Courses details (BCA, BBA)
- Faculty information
- Admission details
- Student login access
- Announcements and news
- Contact and inquiry system

The system aims to improve communication and provide easy access to academic information.

1.3 Definitions, Acronyms, and Abbreviations

- **SRS** – Software Requirements Specification
- **TNPC** – The New Progressive College
- **Admin** – Administrator

- **DBMS** – Database Management System

1.4 References

- IEEE 830-1998 Recommended Practice for Software Requirements Specification
- Project guidelines provided by the institution

1.5 Overview

This document describes the overall system description, functional requirements, non-functional requirements, database requirements, constraints, and future enhancements.

---

2. Overall Description

2.1 Product Perspective

The system is a standalone web application accessible via web browsers on desktop and mobile devices. It uses:

- Frontend: HTML, CSS, JavaScript
- Backend: PHP
- Database: MySQL
- Web Server: Apache

2.2 Product Functions

The system shall:

- Display homepage with announcements and news
- Provide About Us information
- Display course details (BCA, BBA)
- Display faculty information
- Provide admission details
- Allow student login

- Provide admin panel for management
- Provide inquiry/contact form

2.3 User Classes and Characteristics

2.3.1 Visitor

- Can access public information
- No login required

2.3.2 Student

- Login required
- Can view profile
- Download syllabus/material
- View results

2.3.3 Administrator

- Full system access
- Manage courses
- Manage faculty
- Manage students
- Update announcements

2.4 Operating Environment

The system shall operate on:

- Windows OS
- Web Browsers (Chrome, Edge, Firefox)
- Mobile Devices
- Apache Web Server
- MySQL Database

2.5 Design and Implementation Constraints

- Internet connection required
- Hosting server required
- System developed using PHP and MySQL
- Regular maintenance required

2.6 Assumptions and Dependencies

- Users have internet access
- Users have basic knowledge of web browsing
- Server infrastructure is available

---

3. Specific Requirements

3.1 Functional Requirements

3.1.1 Homepage

- The system shall display college name and logo.
- The system shall display navigation menu.
- The system shall display latest announcements.
- The system shall display news and events.
- The system shall provide brochure download option.

3.1.2 About Us Module

- The system shall display vision statement.
- The system shall display mission statement.
- The system shall display information about TNPC.

- The system shall display information about TNPC.
- The system shall display facilities.
- The system shall display reviews.

3.1.3 Courses Module

- The system shall display BCA course details.
- The system shall display BBA course details.
- The system shall display eligibility criteria.
- The system shall display course duration.
- The system shall allow inquiry submission.

3.1.4 Faculty Module

- The system shall display faculty list.
- The system shall display name, qualification, and experience.

3.1.5 Admission Module

- The system shall display admission procedure.
- The system shall display required documents.
- The system shall allow admission inquiry.

3.1.6 Student Login Module

- The system shall authenticate student using username and password.
- The system shall allow students to view profile.
- The system shall allow students to download materials and syllabus.
- The system shall allow students to view results.

3.1.7 Admin Module

- The system shall allow admin login.
- The system shall allow admin to add/edit/delete courses.
- The system shall allow admin to manage faculty.
- The system shall allow admin to manage students.
- The system shall allow admin to update announcements.

3.2 Non-Functional Requirements

3.2.1 Performance Requirements

- The system shall support multiple concurrent users.
- The system response time shall not exceed 3 seconds under normal load.

3.2.2 Security Requirements

- The system shall provide secure login authentication.
- The system shall encrypt passwords in database.
- The system shall restrict unauthorized access.

3.2.3 Usability Requirements

- The system shall provide user-friendly interface.
- The system shall be responsive for mobile devices.
- The system shall provide easy navigation.

3.2.4 Reliability Requirements

- The system shall operate 24/7 with minimal downtime.
- Regular database backup shall be maintained.

---

4. Database Requirements

The system shall include the following main tables:

- Admin (Admin_ID, Username, Password)
- Students (Student_ID, Name, Email, Password, Course_ID)
- Courses (Course_ID, Course_Name, Duration, Eligibility)
- Faculty (Faculty_ID, Name, Qualification, Experience)
- Admissions (Admission_ID, Student_ID, Documents)
- Inquiry (Inquiry_ID, Name, Email, Message)

Primary keys and relationships shall be properly defined.

---

5. Future Enhancements

- Online fee payment system
- Internal result management system
- Attendance management
- Placement portal
- Alumni management system
